VISUAILS

Photo guide

How to shoot the product photos we need

A phone by a window is enough. Watch four things, and run through the five questions at the bottom before you upload.

Per product

Front — Needed

Flat on a clear floor or against a door, fully in frame, in daylight.

Back — Needed

Same spot and light, product turned over.

Detail — Needed

The logo, the print or the label — whatever has to be right in your images. No logo? Then the fabric.

Worn — Optional

Show how it hangs. For lifestyle, we recommend it.

Without a worn photo we assume a regular, straight fit.

01 Light

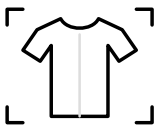

- Daylight by a window; lamp and flash off.
- All products in one go, in the same spot: then the photos in a set match.
- Too dark? The form tells you right away when you upload.

Sent in like this

02 Surface

- A clear floor or a door, not a bed or sofa.
- Ironed or steamed, no creases.
- Swing tags and price stickers off.

03 Frame

- Straight on or straight from above, with the lens at 1×.
- No Portrait mode and no filter; wipe the lens clean first.
- The whole product in frame, with a little room around it.
- At least 1000 pixels on the long side; the form refuses a smaller photo.

04 Close-up

- The logo, the print or the label — whatever has to be right in your images. No logo? Then the fabric.
- The colour you give with your order, as in your webshop, is what counts.
- Tip: put a sheet of white printer paper half in the frame; it shows us what colour the light adds.

Before you upload

- ☐ Daylight, lamp off?
- ☐ Sharp right to the edges?
- ☐ The whole product in frame?
- ☐ Front and back really different?
- ☐ Colour as it looks in your hand?
